Program Overview

Partnering with the IRS, the Montana Department of Revenue began accepting electronic Partnership Tax returns starting in December 2008. Returns will be prepared and submitted using the Modernized E~File (MeF) system. Montana will be accepting both Fed/State and State-Only returns from authorized E~File providers.

All software developers are required to participate in acceptance testing prior to sending production returns. Prior to testing all software developers should complete the Montana MeF Vendor Registration. This registration form provides the department with primary contact information and software limitations for vendors wanting to participate in the Montana MeF CLT-4 program.

Once a software vendor has passed Montana testing, production returns will be accepted for that vendor. Production returns will have acknowledgements created and transmitted back to the vendor through the IRS.

Contact Information

There are many different people at the department working on the Modernized E~File program. Therefore, we recommend that all questions be submitted to the primary contact listed below. Also, questions in the form of an e-mail are preferred because they can be forwarded to the person best suited to answer the question.

MeF Participation and Acceptance

The Montana Department of Revenue will partner with all IRS approved software vendors in the development of a Modernized E~File program for Montana Partnership and S Corporation Tax. Prior to development, software vendors should complete the Modernized E~File (MeF) Software Vendor registration form. This registration form is usually sent to the NACTP for distribution and can also be found on our website.

Montana will make available schemas for our base forms (CLT-4) and a large number of supporting schedules and credit forms. At this time we do not have any requirements or mandates on what software vendors must support. However, we do encourage software vendors to support as many forms as possible to create a tax return that is as complete and accurate as possible.

ATS Testing

Montana requires all software developers and transmitters to test with the MT DOR. Montana will start ATS testing of current year returns when the IRS starts this process. Prior year returns could also be tested if requested by a software vendor.

The Montana Department of Revenue ATS package will may include up to 12 test returns. These tests will be criteria based. These scenarios will include a list of what lines are to be tested. The values sent will be left up to the software vendor. We strongly encourage all software vendors to test as many fields as possible. Software developers must send all tests that are supported at least once to successfully pass ATS. Please include all tests returns each time tests are submitted.

The ATS test cases are criteria based. In order to facilitate our testing process a PDF copy of each test case will need to be submitted at the same time the returns are submitted to the IRS. We will use this PDF copy to compare the MeF data received to the actual return submitted. Any differences will be identified in the compares document created after the tests have been reviewed. If the ATS

test cases need to be corrected, please make the corrections indicated in the compares document and resubmit all the tests cases.

Once ATS test cases have been submitted to the IRS please forward the state submission ID's to DORMeF@mt.gov. Doing so will help us identify who submitted the test cases and allow for tracking of the returns through the testing process. Once returns have been successfully received from the IRS they will be added to the queue for review. In most cases ATS test cases will be reviewed in the order they are received. After the tests have been reviewed a compares document will be sent by email to the software vendor.

A preliminary test packet will be made available to software vendors **Monday October 14th, 2013**. The IRS will make available Fed/State testing **November 4th, 2013**. At this time the Montana Department of Revenue should be able to accept ATS test returns.

Tax preparers are not required to test with the Montana Department of Revenue.

- State-Only – A Montana return submitted without an original Federal return

Software Vendor Responsibilities

- Develop application following all IRS and State of Montana specifications.
- Participation and completion of testing before any production returns are transmitted.
- Submit complete and accurate Partnership Tax returns.
- Submit well formed XML data.
- Be responsive to department requests for changes once production starts and issues arise.
- Release software updates to preparers in a timely manner.

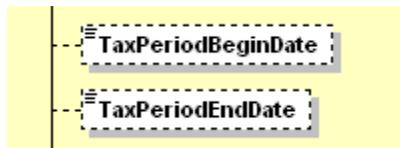

Submission Manifest

The following values should be used in the state submission manifest.

Element Name	Form CLT-4
GovernmentCode	MTST
StateSubmissionType	CLT-4
SubmissionCatagory	CORP

Return Header State

The following items from the ReturnHeaderState are required for Montana returns.

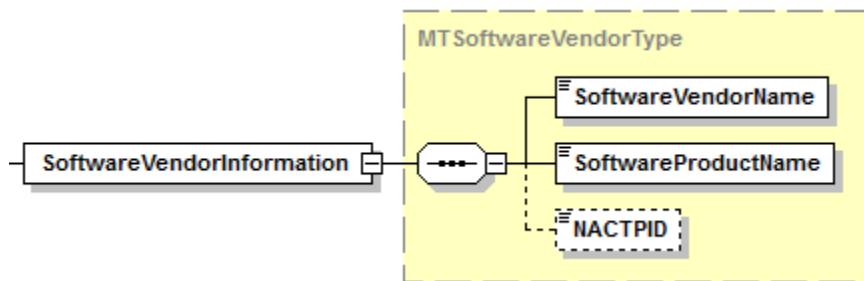

Direct Deposit and Direct Debit

The Montana Department of Revenue does support both Direct Deposit of a refund as well as Direct Debit of a tax due. At this time we do not allow for a refund to be split and deposited into separate bank accounts.

Software Vendor Information

New to TY2013 is an element called **SoftwareVendorInformation** (shown below). We have added this element to make it easier for department staff to identify which software vendor and/or product was used to create and submit an MeF return. This new element is the first element in the state return. This information is only in the MeF information and is not on the paper form itself. This is a required element where two of the three child elements are required.

For the required element **SoftwareVendorName** we would expect to see the name of the software firm. The **SoftwareProductName** element is required and should be populated with the name of the product being used to complete the return. The **NACTPID** element is optional, however it is strongly suggested this element be populated with the ID number assigned by the NACTP.
